

SPECIAL OFFER FOR PROCESS STEAM USERS

Failed steam traps are money traps

Steam traps typically fail within 3 to 5 years, and each failed steam trap can harm your system, your process, and raise your energy bill.

DTE

A steam system can operate with unnoticed failed traps for months; making your whole system work harder, affecting your process efficiency, and costing you money. Finding failed steam traps often requires specialized knowledge and equipment.

The DTE Energy Find & Fix[®] Gas Program provides a no cost, professional steam trap survey and incentives to offset the cost of steam trap replacement—making maintenance easy. Participation results in properly working steam traps, a more efficient process, and a lower energy bill.

Here is how it works

Contact us at 248.206.2421 or ffsteam.dteenergy@esciences.us.

We conduct a free steam trap survey at your business.

Failed steam traps are replaced; work can be completed in-house or by a trade contractor.

You receive incentives to cover the costs of replacing failed steam traps, and continue to benefit with energy savings.

Get your survey

To reserve your survey, or for more information, contact us at 248.206.2421, ffsteam.dteenergy@esciences.us, or visit our website ffsteam.dteenergy.com
